Re: John Simonlaca

[REDACTED]

DOB: [REDACTED]

The Honorable Anne M. Donnelly
United States District Judge
and
Lisa Langone
United States Probation Officer

I am a cardiologist who treats Mr John Simonlaca. The patient has a medical history of a bicuspid aortic valve from birth, and has a history of tobacco use. He also has class 1 obesity with a Body Mass Index of 31 kg/m2.

The combination of his history of a congenital aortic valve disorder plus tobacco use and obesity put him at a high risk of complications from a potential COVID-19 infection. In my medical opinion, given the well documented high incidence of COVID spread in correctional facilities, he would be at a higher risk of morbidity and mortality from incarceration than the general public.

SANJAY D. NAIK, M.D.
